### **The Two-way Satellite GPS Tracking Advantage**

Only GPS fleet tracking systems using satellite communication can provide real-time data from remote and rugged regions, across the globe!

FMS takes you beyond simple tracking by providing the information you need to improve the safety, productivity, and profitability of your business.

September 2009

# **Global Partnership Opportunities Channel Partner Overview**

Reduce risk, improve safety and security, and optimize fleet operations with real-time, two-way satellite fleet management and GPS tracking.

## **Why Choose FMS?**

Fleet Management Solutions, Inc. (FMS) provides complete mobile asset tracking and management solutions across many industries. Combining the latest Global Positioning System (GPS) technology with advanced two-way, satellite-based communications, FMS delivers a turn-key system providing customers measurable improvements in asset utilization and labor productivity, while reducing the risk of theft and cost of recovery.

To keep pace with our explosive growth, FMS relies on a global network of agents and value added resellers to market, sell and support our proven solutions.

## **FMS Referral Partner Program**

A program designed for professionals who want to profit from their extensive contacts in the Fleet Management market space. Referral partners register opportunities and co-sell with FMS. Customer contacts who would benefit from GPS fleet tracking and satellite communications are essential for success.

## **FMS Distributor Partner Program**

For organizations prepared to provide installation, training and support for end user clients. Distribution partners are selected for geographies and industries where FMS is expanding and wants to quickly get into a market that is underserved. Telematics knowledge and experience are mandatory for consideration.

Contact FMS today to see how you can grow your business by providing next generation all-satellite GPS Asset Tracking and Management to your clients.

## Real-Time Data From Anywhere, Anytime

FMS tracking modules maintain continuous GPS location, direction and speed information and combine that with vehicle performance data for complete mobile resource management. Fleet information is delivered from the vehicle via satellite, ensuring data delivery without need for cell towers and regardless of land geography. Data is received, stored and analyzed at the FMS network operations center and is accessed from the FMS hosted application, Fleet Central.

### Oil & Gas

Operations in remote locations and harsh environments require reliable and rugged products that

### Government & Military

FMS meets the real-time fleet tracking needs and strict security requirements associated with government and

### Construction & Mining

FMS enables safety and efficiency on the job in construction, mining and remote infrastructure operations

### Logistics

FMS specializes in global, continuous tracking coverage for logistics operations in remote and hazardous regions,
